

Plant Type	Common Name	Botanical Name	Exposure	Season of Interest	Size	Description
Evergreen	Fetterbush	Leucothoë fontanesiana 'Rainbow'	Partial Shade to Shade	Late Spring	3-5' x 3-5'	<p>Leucothoë fontanesiana 'Rainbow' boasts gracefully arching, striking red stems with colorful, creamy white and green mottled foliage with scarlet accents. Showy, drooping clusters of white flowers in May-June add a nice touch to cut arrangements.</p> <p>Effective as hedge, or clip to create an attractive groundcover. A beautiful, natural woodland companion to rhododendrons and ferns. This slow growing, multi-stemmed, suckering evergreen, adds beauty to any garden.</p> <p>Best grown in moist, acidic, organically rich, cool, sandy to clay, well-drained loams in part shade.</p>
Evergreen	Hybrid Camellia	Camellia 'Winter's Joy'	Partial Shade	Fall	6-8'	<p>The thick, dark green, evergreen leaves of Camellia 'Winter's Joy' are attractive all year long. Sumptuous, semi-double flowers of rich pink are borne in October and November. This evergreen shrub is of narrow and upright habit - good for that tight spot.</p> <p>This is a hardy selection of what has for years been considered a "southern plant"; it should be planted in a location that is protected from extremes of sun and temperature.</p>
Evergreen	Mountain Laurel	Kalmia latifolia 'Bullseye'	Partial Shade to Shade	Year Round	6-10'	<p>The deep purplish cinnamon colored buds open to a creamy blossom, in May-June, with a broad purple band around the inside with a white throat and edge. The new growth is reddish bronze.</p> <p>The mountain laurels are excellent broadleaf evergreens for the shady border. It is a native shrub, which can be naturalized in a wooded setting and requires acidic, moist well-drained soil.</p>

Evergreen	Mountain Laurel	Kalmia latifolia 'Sarah'	Sun to Partial Shade	Late Spring	4-5' x 4'	<p>Mountain laurels are beautiful slow growing evergreen shrubs. 'Sarah' has the reddest flower of all the cultivars and a dense upright habit with an overall rounded shape. The buds of this flower are actually red, then a pinkish-red when open.</p> <p>Purplish red new stems. Flowers open over a two week period in late May and early June. Tends to grow best at the edge of the woods and areas protected from drying winds.</p> <p>This species is tolerant of shearing and pruning which is best done just as flowering season ends to enable the new growth to set flower buds for the next year. When allowed to grow naturally, it matures to a large multistem plant with thick trunks and picturesque branching. Moderately drought tolerant once established. Cultivars with highly colored flowers produce best color in full sun.</p> <p>It does not like to be over-fertilized.</p>
Evergreen	Mountain Laurel	Kalmia latifolia 'Yankee Doodle'	Partial Shade	Late Spring	7-15' x 7-15'	<p>This cultivar has red buds that open in May-June to an irregular maroon-banded flower with a large white throat. The foliage is yellowish green.</p> <p>Mountain Laurel is an excellent broad-leaved evergreen for shady borders. It requires cool, acid, moist, well-drained soil.</p>
Evergreen	Sheep Laurel	Kalmia angustifolia	Sun to Partial Shade	Summer	3' x 6'	<p>Looking for a flowering evergreen shrub that would tolerate most soil conditions (bogs to sandy areas) and would also attract pollinators? Look no further than this native laurel that blooms in spring. Also called sheep laurel, this low growing shrub blooms in June and July. Flowers are small in comparison to the other species Kalmia latifolia. Leaves are evergreen and are tinged blue.</p> <p>Warning: poisonous if ingested.</p> <p>Drought tolerant once established.</p>

Evergreen	Sweetbay Magnolia	Magnolia virginiana	Sun to Partial Shade	Spring	10-20' x 10-12'	<p>The sweetbay magnolia is a lovely native specimen tree with lustrous green foliage with a silvery underside. Fragrant, creamy white, lemon scented flowers, 2-3" in diameter, are borne in early June and produced sporadically through most of the summer. Seedpods are 2" long. The dark red seeds emerge from the pods and persist there, remaining attractive until they're dropped or picked off by animals.</p> <p>Different from most magnolias in that it does well in wet and even swampy soils; also tolerates shade; requires acid soil.</p>
