

Plant Type	Common Name	Botanical Name	Exposure	Season of Interest	Size at Maturity	Description
Perennial	Allegheny Pachysandra	Pachysandra procumbens	Sun to Partial Shade	Year Round	6-8"	<p>Similar in form to the Japanese pachysandra one sees everywhere, except much more interesting. Leaves are a dull green, sometimes mottled with lighter flecks.</p> <p>Barely noticeable flowers are produced as early as March and perfume the air with their delicate fragrance.</p> <p>A wonderful native groundcover.</p>
Tree	Allegheny Serviceberry	Amelanchier laevis	Sun to Partial Shade	Spring	15-20'	<p>Native to the eastern half of the United States, this rarely offered serviceberry is admired for its showy white flowers that appear as the leaves begin to unfurl, usually in mid to late April. Each single white blossom resembles those of cherry, apple or hawthorne, all with whom it is related. In mid summer, the purple/black fruits ripen and are eagerly eaten by birds. Pick your berries before the birds take them and make a first-class serviceberry pie - considered by many to be superior to blueberry pie! Fall color completes the year with fiery shades of orange-reds. Allegheny Serviceberry prefers to grow in those partial sun/shade situations along woodland edges, against large conifers, or planted in informal groupings. Tolerant of many soil types, it thrives in moist, well-drained soils that do not dry out. Pruning is rarely required. The Allegheny serviceberry is reportedly resistant to fire blight.</p>

Shrub	American Cranberrybush	<i>Viburnum trilobum</i> 'Wentworth'	Sun to Partial Shade	Year Round	10-12' x 10-12'	<p>'Wentworth' is an outstanding native deciduous native plant has three seasons of interest. White flat topped flowers, 3-4 1/2" across become clusters of 1/4" berries starting green then changing pink to sparkling red. Fruit is quite delicious. Finally, in autumn, the 3-lobed foliage takes on stunning shades of burgundy.</p> <p>'Wentworth' has an upright habit that makes it useful as a screen or an informal hedge. Plants flower and fruit best in full sun, but tolerate partial shade, and they require evenly moist but well-drained soil.</p>
Shrub	American Filbert	<i>Corylus americana</i>	Sun to Partial Shade	Spring to Fall	8' x 6'	<p>If a tougher shrub exists, the United States Marine Corps is probably recruiting it right now. The American Filbert (aka Hazelnut) can take our abuse (accidental mowing, the indiscriminate snow plow, your kids breaking branches for cruel sport) and still look pretty.</p> <p>Leaves are rough to the touch, raspy golden green in summer, followed by lush russet reds, orange and yellow in fall. Flowers are intriguing catkins (like birch). When a few are planted, count on hazelnuts for harvest.</p> <p>The best features of this shrub are tenacity and rugged good looks in difficult sites.</p>

Tree	American Hornbeam	<i>Carpinus caroliniana</i>	Sun to Partial Shade	Fall to Winter	20-30' x 20-30'	<p>Rigid branching patterns, smooth gray bark that reveals muscle-like wood beneath, dangling catkin flowers in spring, clean small birch-like leaves, and unusual leafy cones in fall make this one of those small trees you wonder how you lived without until you plant one.</p> <p>Adaptable to sun, shade, moist or relatively dry soils, bottomland or upland--a plant as tough as its name.</p>
Perennial	American Maidenhair Fern	<i>Adiantum pedatum</i>	Partial Shade	Spring to Fall	18-24"	<p>This fern has a delicate beauty. Dainty, feathery, fine textured fronds have a striking black stem. A slow spreader from rhizomes, this plant is easily grown.</p> <p>A good well drained neutral soil is best.</p>

Shrub	American Plum	<i>Prunus americana</i>	Sun to Partial Shade	Spring to Fall	10-20' x 15-25'	<p><i>Prunus americana</i> is a small, deciduous, single trunk tree or multi-stemmed freely suckering shrub. Green toothed, oblong to ovate leaves that are 3-4" long, turn yellow to red in autumn. White showy flowers appear before the leaves in Spring.</p> <p>The plum fruit ripens in July-August and can be used to make jellies and jam. Stems, leaves, and seeds contain cyanide, TOXIC to humans and animals!</p> <p>It is easily grown in average, dry to medium, well-drained soils. Remove suckers to prevent unwanted spread or to train into a small tree. Its thickets provide good cover for songbirds and small mammals year-round. This plant provides nectar for pollinators and is a larval host plant for several species of butterflies.</p>
-------	---------------	-------------------------	-------------------------	----------------	--------------------	--

Tree	American Smoketree	<i>Cotinus obovatus</i>	Sun to Partial Shade	Late Spring	15-30'	<p>American smoketree is an upright, small tree or multi-trunked shrub, growing 15-30 ft. tall. It has a short trunk, open crown of spreading branches, resinous sap with a strong odor, and deep orange-yellow heartwood.</p> <p>Six to ten inch flower panicles develop long, red or purple, hairlike petioles that, in the crowded flower clusters, create a smoky appearance. (The flower itself is small and not showy.) Berries occur infrequently on pinkish stems; these also have a smoke-like look. Spring leaves are silky pink, becoming bluish to dark green.</p> <p>Fall leaves are magnificently colorful. A gnarled limb structure and the dark, flaking bark are other attributes. The masses of smoke-like fruit clusters with hairy stalks of sterile flowers give the species its common name</p>
Vine	American Wisteria	<i>Wisteria frutescens</i> 'Amethyst Falls'	Sun to Partial Shade	Late Spring- Early Summer	20'	<p>'Amethyst Falls' is an "improved" selection of the native American Wisteria. It has longer and deeper purple flower clusters and it also flowers as a younger plant. It is equally as fragrant and as obedient as the other American Wisterias.</p>

Shrub	Arrowwood Viburnum	Viburnum dentatum	Sun to Shade	May	5-15'	<p>Native Americans used the strong shoots of this plant for the shafts of their arrows. Flat-topped clusters of small white flowers are attractive to butterflies and are followed in fall by the bluish-black fruits that birds love.</p> <p>The foliage is a lustrous green throughout the summer. This viburnum is tough and very adaptable to a variety of soils.</p>
Perennial	Autumn Fern	Dryopteris erythrosora 'Brilliance'	Partial Shade to Shade	Fall	18"	<p>'Brilliance' is a top performer in USDA Hardiness Zones 5-8. Plants can reach 12-24 inches tall depending on the environment, with a spread of 1-2 feet. It has an upright, open habit and moderate density.</p> <p>Autumn fern does not have any big pest or disease problems.</p>

Perennial	Barbara's Buttons	Marshallia grandiflora	Sun to Partial Shade	Early Summer	12-24" x 10"	<p>In early summer, tiny, orchid pink, tubular florets with bluish-purple anthers form solitary, terminal daisy florets which last for a couple of weeks. The flowers rise on long stems up to 18" high from basal rosettes of deep green, lance-shaped leaves. A native American plant found along streams and in clearings from Pennsylvania to North Carolina and Tennessee.</p> <p>Plants form 10" clumps of evergreen, glossy, bright green leaves.</p> <p>Easily grown in average, medium, well-drained soil in full sun to part shade. Prefers light shade and moist, humusy, slightly acid soil.</p>
Perennial	Barrenwort	Epimedium grandiflorum 'Lilafee'	Partial Shade to Shade	Mid Spring	8-12"	<p>Exceptionally large, lavender-violet, star-shaped flowers are borne in racemes. Leaves are oval coming to a point, acquiring shades of red and tan during spring and fall.</p>
Perennial	Bear's Foot Hellebore	Helleborus foetidus	Partial Shade to Shade	Spring	18"	<p>This is a great plant for the spring garden. Tall spikes of bright green flowers are one of the first to appear – often in late winter. The deeply divided dark green leaves are evergreen and add fabulous structural texture to shady areas.</p> <p>Tolerant of a variety of conditions and self-sows easily.</p>

Perennial	Big Merrybells	<i>Uvularia grandiflora</i>	Partial Shade	Mid Spring	18-24"	Arching stems with pendulous flowers appear in April. Flower petals and leaves have an interesting slight twist. Native to the Northeastern United States and Midwest.
Shrub	Blackhaw Viburnum	<i>Viburnum prunifolium</i>	Sun to Partial Shade	Spring to Fall	15-30'	<p>Blackhaw is usually grown as a large, upright, multi-stemmed, deciduous shrub with an irregular crown, but also may be grown as a small, single trunk tree. As a shrub, it typically grows 12-15' tall with a spread of 6-12', but as a tree may reach a height of 30'.</p> <p>This native plant has white flowers in flat-topped cymes appearing in spring. Flowers give way in autumn to blue-black, berry-like drupes which often persist into winter and are quite attractive to birds and wildlife.</p> <p>Ovate, finely toothed, glossy dark green leaves (to 4" long) turn attractive shades of red and purple in fall. Fruits are edible and may be eaten off the bush when ripe or used in jams and preserves.</p>

Perennial	Blue Flag	Iris versicolor	Sun to Partial Shade	Late Spring	24-36"	<p>The Water Iris 'Versicolor', a spring water-planted tuber, produces beautiful violet-blue flowers accented by whitish markings at the base of the sepals. Water Irises have attractive bladelike foliage.</p> <p>Water Irises usually live in water that is rich in oxygen and receives a lot of sunlight. Although it thrives near water it will tolerate garden conditions if provided an evenly moist soil. The root has been used medicinally.</p>
Perennial	Blue Flag	Iris versicolor 'Purple Flame'	Sun to Partial Shade	Spring to Summer	2-3' x 2-3'	<p>'Purple Flame' has a richer, more intense cast to stems and flowers but the true beauty lies in the irresistible foliage. Emerging in March, the purple flame-like foliage provides an unparalleled performance of vivid and intense eggplant purple foliage followed by an encore of rich and abundant flowers. The blade-like leaves transition to green as the weather warms.</p> <p>The flowers bloom in early summer from deep violet to white with yellow blotches on the throat. The petals and sepals spread to form an easy feeding vessel for hummingbirds.</p> <p>Perfect for adding a bit of lushness around a water feature or placing in full sun where the soil is too wet and heavy for other perennials.</p>

Perennial	Blue Stemmed Goldenrod	<i>Solidago caesia</i>	Partial Shade	Late Summer	18-36"	<p>Gracefully arching stems display hundreds of tiny shooting stars of yellow flowers in August and September. Young stems are light green turning blue-grey or burgundy-grey. Songbirds, insects, and other wildlife are attracted to the nectar and pollen.</p> <p>Does well in a semi-shaded garden. Prefers moderately rich, well drained soil. It is resistant to disease.</p>
Perennial	Bluestar	<i>Amsonia hubrichtii</i>	Partial Shade	Early Summer	28"	<p>This uncommon species features very finely textured foliage that just begs to be touched. Unusual steel-blue flowers bloom in June. The show really heats up with the incredible fall color as the leaves change to a striking fire yellow orange.</p> <p>This native plant is an excellent low maintenance perennial for moist, fertile soils.</p>

Shrub	Bottlebrush Buckeye	<i>Aesculus parviflora</i>	Sun to Partial Shade	Summer to Fall	8-10' x 8-15'	<p>Bottlebrush buckeye grows to become a wide-spreading, suckering, multi-stemmed shrub. Large, medium to dark green compound leaves have their leaflets arranged like fingers radiating from a person's hand and measure 8-10" across. Small white flowers are arranged in cylindrical clusters that are 8-12"s long and 2-4" wide.</p> <p>This native buckeye blooms in our area around July Fourth each summer for 2 to 3 weeks. In the fall the leaves turn a glowing yellow. Plant in a well-drained soil that has plenty of organic matter; prefers acid soil, but is adaptable.</p>
Perennial	Cardinal Flower	<i>Lobelia cardinalis</i>	Partial Shade	Summer	3-4'	<p>Tall spikes of rich scarlet flowers that attract hummingbirds are borne in mid to late summer. Native to our streamsides or damp meadows, cardinal flower thrives in moist soils and will self-sow.</p>

Shrub	Carolina Buckthorn	Frangula (Rhamnus) caroliniana	Partial Shade to Shade	Summer	16' x 6'	<p>Carolina buckthorn is a great addition to the woodland garden for it thrives as an understory plant with its shiny leaves. It stands attractively alone or works as a specimen. Many bird species feed on the bright red fruit. By fall, the fruits turn black.</p> <p>In light shade, Carolina buckthorn is airy and tiered, somewhat like the flowering dogwood also found in our woods. Three to four hours per day of sun are necessary. With more sun, the plant tends to get dense and shrubby losing some of its charm. Seedlings are produced in profusion.</p>
Perennial	Cinnamon Fern	Osmunda cinnamomea	Partial Shade to Shade	Spring to Fall	2-5'	<p>Cinnamon fern derives its name from its first leaves which unfold in the spring and are erect and covered with brown spore capsules, resembling cinnamon sticks. These are followed by larger, coarse-textured fronds.</p> <p>Osmunda ferns prefer moist, acid soils and are handsome additions to wet woodland or stream-side gardens.</p>

Perennial	Closed Gentian	<i>Gentiana andrewsii</i>	Sun to Partial Shade	Late Summer	24" x 18"	<p>Gorgeous blue to violet flowers remain closed and budlike even at full bloom. Because of this odd habit, the only insect tough enough to actually pollinate this gentian is the bumble bee.</p> <p>Does best in full to partial sun and moist rich soil. This native plant is considered threatened in many states in the Northeast. Cardinal flower, penstemon and Marsh Milkweed are good companions.</p>
Perennial	Common Shooting Star	<i>Dodecatheon meadia</i>	Sun to Partial Shade	Spring	6-10"	<p>Shooting stars are much-loved wildflowers that resemble comets with the pink back-swept petals flaring behind. The flowers are held on tall stems, which rise above the basal rosette of thin succulent leaves. This species is a native of our eastern and central woods and meadows, preferring lots of spring moisture. Like Virginia bluebells, they are a spring ephemeral, going dormant in the summer heat.</p> <p>Easy to grow in average soil as long as there is plenty of spring water.</p>

Shrub	Common Sweetshrub	Calycanthus floridus 'Athens'	Sun to Partial Shade	Spring to Fall	4-8' x 4-8'	<p>This cultivar bears yellow flowers with an enticing fruity fragrance. The habit of growth is dense and rounded. Flowers are born on current growth, so do desired pruning after flowering.</p> <p>Be sure to incorporate this carefree plant where fragrance can be enjoyed. Adapts to many soils but does best in moist deep loam</p>
Perennial	Crested Iris	Iris cristata	Partial Shade	Spring	6"	<p>This interesting native iris has neat fans of small sword-like leaves that create an interesting textural form in the garden. Flat, star-shaped, blue, upward facing flowers adorn the plant in May.</p> <p>Once established, preferably in semi-shade and moist soil, it will spread slowly until hindered.</p>
Shrub	Dwarf Bush Honeysuckle	Diervilla lonicera 'Copper'	Sun to Partial Shade	Summer	3' x 3'	<p>'Copper' is a dwarf bush honeysuckle cultivar that is noted for its copper-red new growth, yellow flowers and attractive fall color. It is a suckering, densely-branched, deciduous shrub that slowly grows to 2-3' tall. Yellow trumpet-shaped flowers bloom in late spring to early summer. New growth leaves emerge copper-red with bronze-red to orange-red fall color.</p> <p>Easily grown in average, medium moisture, well-drained soils in full sun to part shade. Tolerates some drought. Wide range of soil tolerance. Plant will spread by underground runners or stolons.</p>

Perennial	Dwarf Catmint	Nepeta x faassenii (racemosa) 'Junior Walker'	Sun to Partial Shade	Summer to Fall	1.5' x 3'	<p>This low growing catmint will cascade over any rockwall or container and bloom from summer to early fall. Unlike other catmints, 'Junior Walker' is sterile and will not self-seed. Flowers are light blue/purple.</p> <p>Sheer to encourage reblooming. Drought resistant once established.</p> <p>Companion plants: Peonies, Daylilies and Coreopsis</p>
Perennial	Dwarf Lady's Mantle	Alchemilla erythropoda	Sun to Partial Shade	Spring to Summer	.5' x 2'	<p>This charming dwarf lady's mantle sprouts gray-green serrated foliage and zesty citron-yellow flower clusters that turn reddish once they're done.</p> <p>Chartreuse colored flowers will appear in late spring in to early summer. Towards mid summer, leaves may need refreshing. Just sheer them back and a new flush of leaves will appear.</p> <p>Plant as a ground cover in rock gardens, dish gardens or that tough hell strip. Plant with sedums, dwarf irises and hardy geraniums</p>

Tree	Eastern Redbud	<i>Cercis canadensis</i> 'Ace of Hearts'	Sun to Partial Shade	Spring to Fall	8-12' x 9-15'	<p>'Ace of Hearts' Eastern Redbud is unique because it is a dwarf redbud with very small leaves. It typically grows to about 8' tall and wide compared to the 20' x 20' size of the species. It is a true genetic dwarf. It has the typical vibrant pinky-purple flower color that is so welcome in the spring along with the delightful heart-shaped leaves, although these are also much smaller than the species.</p> <p>Redbud is tolerant of a wide range of site conditions, is not especially vulnerable to insects or diseases, is relatively easy to maintain, and makes a beautiful shrub or small tree, especially when flowering. The bark of redbud has been used as an astringent in the treatment of dysentery. Flowers of the tree can be put into salads or fried and eaten.</p>
------	----------------	--	----------------------	----------------	---------------	---

Tree	Eastern Redbud	Cercis canadensis 'JN2' The Rising Sun™	Sun to Partial Shade	Spring to Fall	12' x 10'	<p>This compact round tree grows 10'-12' ft. high with a 10' spread. Multiple season interest starting with vivid pink flowers in April-May. Large heart-shaped leaves emerge as peachy apricot, turn chartreuse-yellow and finally deep green as they mature all through the Summer. Fall color is golden orange foliage followed by smooth yellow bark in the winter.</p> <p>This native is drought, cold, clay soil, black walnut and heat tolerant. Very resistant to foliage burn. Flowers attract bees and butterflies. Perfect for smaller gardens or accent planting. It was found and introduced by Ray and Cindy Jackson of Jackson Nursery in Belvidere, Tennessee.</p> <p>Naturally resistant to pests and diseases and grows in a wide range of soil types and moisture levels. Plant in full sun to part shade.</p>
------	----------------	--	-------------------------	----------------	-----------	---

Shrub	Eastern Wahoo	Euonymus atropurpureus (atropurpurea) var. atropurpureus (atropurpurea)	Sun to Partial Shade	Year Round	12-24'	<p>This native shrub is also referred to as burning bush with its orange-red fall color and attractive rosy-pink fruit capsules that persist into winter. But don't confuse this plant with the common winged euonymus, Euonymus alatus.</p> <p>This burning bush is very shade tolerant, yet it grows well and becomes an attractive dense specimen in full sun. Can be grown in clump form or pruned up to form an attractive 8-12 foot small tree. Flowers are purple in May to June and then form orange/red fruits in September to October.</p>
Perennial	Fairy-wand	Chamaelirium luteum	Partial Shade to Shade	Early Summer	1-4'	<p>From a basal cluster of evergreen, elliptic or oblong leaves, 1 to 3 foot tall flower stems sprout up and are topped with masses of tiny white, tightly packed white flowers.</p> <p>Ranging throughout the eastern US, this interesting perennial flowers in late spring/early summer and prefers rich, moist soil, and partial to full shade. Eventually plants will naturalize and form sizeable colonies.</p>

Evergreen	Fetterbush	Leucothoë fontanesiana 'Rainbow'	Partial Shade to Shade	Late Spring	3-5' x 3-5'	<p>Leucothoë fontanesiana 'Rainbow' boasts gracefully arching, striking red stems with colorful, creamy white and green mottled foliage with scarlet accents. Showy, drooping clusters of white flowers in May-June add a nice touch to cut arrangements.</p> <p>Effective as hedge, or clip to create an attractive groundcover. A beautiful, natural woodland companion to rhododendrons and ferns. This slow growing, multi-stemmed, suckering evergreen, adds beauty to any garden.</p> <p>Best grown in moist, acidic, organically rich, cool, sandy to clay, well-drained loams in part shade.</p>
Perennial	Fingerleaf Rogersflower	Rodgersia aesculifolia	Sun to Partial Shade	Summer to Fall	6'	<p>If you want to make a bold statement, this Chinese native would be the perfect addition. In mid-summer it bears numerous panicles of white to pink star-shaped flowers. The foliage is woolly, deeply veined, and crinkly in appearance.</p> <p>This plant desires a humus-rich soil.</p>

Tree	Flowering Dogwood	Cornus florida 'Cherokee Chief'	Sun to Partial Shade	Year Round	20-25' x 20-25'	<p>Cornus florida is one of our very top natives grown in the northern United States. It has seasonal interest throughout the year. The cultivar 'Cherokee Chief' is often said to be the best red dogwood in the trade. Flower bracts are rich ruby red and new foliage is red-bronze turning to bright crimson in fall.</p> <p>Birds enjoy the glossy berries into December. It is a low branched tree with layered horizontal branching, a unique, handsome structure in the landscape. Mulching is beneficial to maintain a moist, cool soil.</p>
------	-------------------	------------------------------------	----------------------	------------	--------------------	---

Tree	Flowering Dogwood	Cornus florida 'Cloud Nine'	Sun to Partial Shade	Spring	15-30' x 15-30'	<p>Cornus florida arguably may be the most beautiful of the native American flowering trees. 'Cloud Nine' is noted for its showy overlapping white bracts (to 2 1/2" long) and its abundant flowering. Oval, dark green leaves (3-6" long) turn attractive shades of rust-red in the Fall. A winner in any garden!</p> <p>Bright red fruits are bitter and inedible to humans (some authors say poisonous) but are loved by birds. Fruits mature in late summer to early fall and may persist until late in the year.</p> <p>Easily grown in average, medium moisture, well-drained soils in full sun to part shade. Prefers moist, organically rich, acidic soils in part shade. Benefits from a 2-4" mulch which will help keep roots cool and moist in summer.</p>
Perennial	Foamflower	Tiarella cordifolia	Partial Shade to Shade	Late Spring- Early Summer	6-12"	<p>The Foamflower makes a great groundcover for the shade garden. The white flower spikes are pyramidal and float above the maple-shaped leaves in the spring.</p> <p>When planted in mass it resembles a sea of foam. This semi-evergreen perennial has great fall interest with its burgundy hued leaves.</p>

Perennial	Fox Sedge	<i>Carex vulpinoidea</i>	Sun to Partial Shade	Spring	3' x 3'	<p>This is a resilient sedge for wetlands and disturbed sites. Plants prosper in sun or part shade. Moist soil is preferred but plants will tolerate average soils, drought and wet sites.</p> <p>This clump forming perennial is indigenous to both acid and alkaline soils and is adapted to heavy clay. Plants are competitive and in an ideal growing situation may become aggressive.</p> <p>Fox sedge is valuable for wetland restoration and erosion control drainage ditches. Its ability to populate disturbed places makes this sedge a good choice to colonize wetland mitigation sites. Plants are pest resistant and unpalatable to deer and other herbivores.</p> <p>In garden situations, plants should be cut to the ground during late winter. Plant with other wet tolerant plants such as turtlehead and Cardinal flower.</p>
-----------	-----------	--------------------------	----------------------	--------	---------	--

Tree	Franklin Tree	<i>Franklinia alatamaha</i>	Sun to Partial Shade	Year Round	10-20' x 6-15'	<p>Small native tree or shrub with upright spreading branches. Flowers are 3.5" across, showy, white and fragrant. They appear in late July to August. Handsome fall foliage can be spectacular orange to red to purple. Flowering often continues into fall and is spectacular against the fall colored foliage. Seedpods, which persist on the branches through the winter months are unusually looking, 5-valved capsules.</p> <p>Philadelphia's John Bartram found this tree in 1770 along the banks of the Altamaha River in Georgia and collected a few for his garden. This plant has not been seen in the wild since 1790. It is believed that all plants in commerce today are descendants of those collected by Bartram.</p>
Perennial	Giant Lobelia	<i>Lobelia siphilitica</i>	Partial Shade to Shade	Summer	2-3'	<p>Giant Blue Lobelia is a native wildflower found by streams, ponds and moist meadows east of the Rockies. They should be located in rich moist, well drained soil in the shady garden. This is a vigorous plant, once established it self sows, generously creating new plants to share.</p> <p>Low rosettes of leaves are the launching pad for upright flower spikes of clear blue. It is a favorite of birds and butterflies. Deer resistant. Tolerates full sun in northern climates.</p>

Perennial	Goat's Beard	<i>Aruncus dioicus</i>	Sun to Partial Shade	Early Summer	46"	<p>A commanding specimen for the back of the border, this species features green compound leaves topped off by loose plumes of creamy white.</p> <p>Its display is like an astilbe on steroids.</p>
Perennial	Golden Alexander	<i>Zizia aurea</i>	Sun to Partial Shade	Late Spring	18-36" x 18-24"	<p>Golden Alexander is a Missouri native perennial which occurs most often in small colonies in moist woods and meadows, thickets, glades and prairies. Features flat-topped clusters of tiny yellow flowers in late spring atop stems growing to 3' tall.</p> <p>Golden Alexanders is a food plant for the larvae of the Missouri woodland swallowtail butterfly (<i>Papilio joanae</i>).</p> <p>Best massed in open woodland or prairie areas, wild or native plant gardens. Grow in average, medium moisture, well-drained soils in full sun to part shade.</p>
Perennial	Goldie's Fern	<i>Dryopteris goldiana</i>	Shade	Spring to Fall	3-4'	<p>This is the largest of our native wood ferns, topping out at 4' high. Short creeping rhizomes lead to stands of broad arching fronds.</p> <p>This is a useful fern in the woodland or perennial garden for adding masses of lush greenery. Prefers moist leafy soils.</p>

Perennial	Hairy Alumroot	<i>Heuchera villosa</i> ( <i>macrorhiza</i> ) 'Autumn Bride'	Partial Shade to Shade	Early Fall	24"	<p>Large, softly hairy, light green leaves are cool and fresh throughout the summer months. In the fall, large panicles of tiny white flowers rise up above the foliage, adding splash to the fall garden. Hairy alumroot is native to the Appalachians.</p> <p>Performs well in full sun although a bit of shade in the afternoon would be well received. This species has good drought tolerance and seems to do better in hot and humid summers than most heucheras, though some scorch and general foliage decline may occur if soils are allowed to totally dry out.</p>
Perennial	Hardy Cyclamen	<i>Cyclamen</i> <i>hederifolium</i>	Partial Shade	Fall	4-6"	<p>This hardy cyclamen typically grows 4-6" tall and features pink or white tinged with pink flowers (2" long) with a darker eye and reflexed petals. Blooms somewhat profusely in late summer into fall, one flower per stem.</p> <p>Extremely attractive, ivy-shaped, mottled leaves are variably colored, but usually gray-green with silver and white marbling. The flower stalks typically rise up late summer to early fall and are followed by the foliage which persists through winter and goes dormant in late spring.</p>

Perennial	Hardy Grapeleaf Anemone	Anemone tomentosa 'Robustissima'	Partial Shade	Late Summer-Fall	32"	<p>The earliest blooming of the fall anemones, the grape leaf anemone is also one of the hardiest. This selection is one of the showiest perennials for late summer and into the fall with masses of soft pink, single blooms. This quite vigorous form quickly produces a large clump over time. 'Robustissima' is an easy, carefree and low maintenance perennial.</p> <p>It is best grown in part shade and moist soil but is also quite tolerant of a sunny, drier location.</p>
Perennial	Hybrid Anemone	Anemone x hybrida 'Honorine Jobert'	Partial Shade	Late Summer-Fall	36-48" x 18-24"	<p>Single flowers (2-3" diameter) with 6-9 overlapping white petals and yellow center stamens appear on long, wiry-but-graceful, branching stems over an attractive foliage mound of trifoliate dark green leaves.</p> <p>Best in part shade with protection from wind. Foliage tends to burn in hot, dry, sunny summer conditions. Prefers consistently moist, humusy soils with good drainage.</p>

Evergreen	Hybrid Camellia	Camellia 'Winter's Joy'	Partial Shade	Fall	6-8'	<p>The thick, dark green, evergreen leaves of Camellia 'Winter's Joy' are attractive all year long. Sumptuous, semi-double flowers of rich pink are borne in October and November. This evergreen shrub is of narrow and upright habit - good for that tight spot.</p> <p>This is a hardy selection of what has for years been considered a "southern plant"; it should be planted in a location that is protected from extremes of sun and temperature.</p>
Perennial	Hybrid Geranium	Geranium x cantabrigiense 'Karmina'	Sun to Partial Shade	Late Spring	12" x 18"	<p>Karmina hardy geranium spreads by trailing stems to form a foliage carpet which is 8-12" tall and spreading to 18" wide or more. This is ideal to be used as a ground cover, weaving amongst other taller perennials such as Solomon seal and hellebores. Leaves are fragrant and the carmine red flowers appear from May to June.</p> <p>Easily grown in average, medium moisture, well-drained soil in full sun to part shade. Tolerates some drought, but prefers and spreads best in moist, humusy soils with good drainage. Deadheading is tedious for larger plantings and unnecessary. Side stems may be removed at any time to control spread. Foliage may decline after flowering in hot summer climates, at which point it may be refreshed by lightly sheering.</p>

Perennial	Hybrid Stonecrop	Sedum spurium 'John Creech'	Sun to Partial Shade	Year Round	2" x 6-12"	<p>'John Creech' has small, scalloped green leaves that form a durable, weed smothering groundcover. Small pink flowers create a layer of color over the lush carpet of foliage. Foliage and stems develop deep burgundy tones as cooler temperatures arrive. A fine selection for spotting in rock walls and rock gardens, or containers. It is semi-evergreen.</p> <p>Perfect for your garden as well as containers and rock gardens.</p> <p>'John Creech' has many features: Attracts Butterflies, Easy Care, Extreme Cold Hardiness, Fall Color, Gift Plant, Tolerates Poor Soils, Waterwise, Year-round Interest.</p>
Perennial	Hyssop-leaved thoroughwort	Eupatorium hyssopifolium	Sun to Partial Shade	Summer to Fall	2-3' x 1-2'	<p>Eupatorium hyssopifolium is an underappreciated native perennial. Very attractive narrow leaves provide interest throughout the season.</p> <p>Flat topped clusters of white fringed flowers have the overall appearance of clouds and are very attractive. The thousands of tiny white flowers are wonderful as late summer texture.</p> <p>Once established, plants are drought tolerant and easy to grow. Old flowering stems can be cut to ground level anytime during the winter.</p>

Perennial	Interrupted Fern	<i>Osmunda claytoniana</i>	Partial Shade to Shade	Spring to Fall	2-3' x 2-3'	<p>This is a native fern which usually grown in moist, wooded slopes of ravines and wet woodlands. The interrupted fern typically grows in a spreading-vase form to 2-3' tall, but with constant moisture can reach 5' in height. Broad fronds are "interrupted" in the middle by spore-bearing pinnae (leaflets) which typically fall off in mid summer, thus giving rise to the common name. The rhizomes (roots) are the source for <i>Osmunda</i> fiber used in the potting of orchids. Does not tolerate drought.</p> <p>Companion plants to false Solomon seal, wood phlox, foam flowers, royal ferns and hairy alum root.</p>
Perennial	Jack-in-the-Pulpit	<i>Arisaema triphyllum</i>	Partial Shade	May-June	16-20"	<p>One of the most desirable wildflowers of North American Woodlands. One or two green leaves are divided into three leaflets. A long purple-green spathe (the pulpit) encloses a slender spadix (jack). After the flower fades, berries are produced that ripen to a bright scarlet in the fall.</p> <p>Prefers woodland conditions with cool, moist, humus rich soil.</p>

Perennial	Japanese Forest Grass	Hakonechloa macra 'Aureola'	Sun to Partial Shade	Year Round	12" x 15-20"	<p>One of the few grasses that tolerates shade, Hakonechloa forms a graceful colorful groundcover or specimen plant. Slender stems hold bright yellow foliage with thin forest green stripes having the effect of a tiny bamboo. The arching leaves are further accented in early fall with a red-pink tint.</p> <p>Slow spreading and non-invasive it will do best in partially shaded, moist and rich soil areas.</p>
Perennial	Japanese Primrose	Primula japonica	Partial Shade to Shade	Late Spring	1-2'	<p>Japanese Primrose is also known as the candelabra primrose – the flowers bloom in concentric whorls or rings on the tall flower spikes. Their flower color ranges from white to pink to deep rose.</p> <p>It needs a cool, moist root run and thrives in soggy areas or along streams. With the right conditions, it is one of the easiest primroses to grow and self-sows readily to form beautiful colonies.</p>

Perennial	Jerusalem Sage	<i>Phlomis fruticosa</i>	Sun to Partial Shade	Spring to Summer	2-4' x 3-5'	<p><i>Phlomis fruticosa</i> is a unique plant! It grows as a shrubby perennial that typically dies back to the root in the Winter and regrows in the Spring.</p> <p>Whorls of yellow flowers appear in the late summer above gray-green sage-like leaves, and stay into August. A unique and interesting plant to add to sunny parts of your garden, <i>Phlomis</i> prefers rich, well drained soil.</p> <p>Plants will tolerate some drought once established and may be cut back following flowering to promote more blooms.</p>
Perennial	Lady Fern	<i>Athyrium filix-femina</i>	Shade	Spring to Fall	26-30"	<p>This native fern has finely divided leaves of a soft green with dark stems that accent the feathery fronds. It will gradually form a large clump.</p> <p>Plant in shade in a slightly acid, moist fertile soil. Great with wood phlox and coral bells.</p>

Perennial	Lady's Mantle	<i>Alchemilla mollis</i>	Sun to Partial Shade	Year Round	18" x 24"	<p>This low growing perennial is an ideal groundcover or front-of-the-border plant. Decorative, pleated leaves hold dew drops or rain drops on them and sparkle like quicksilver, delighting children of all ages.</p> <p>If that weren't enough, the foliage is topped by clusters of chartreuse flowers in June-July that may be cut and used in fresh or dried arrangements.</p> <p>A moist, well-drained soil is best.</p>
Perennial	Lamb's Ear Betony	<i>Stachys byzantina</i> 'Silver Carpet'	Sun to Partial Shade	Year Round	4-6" x 9-18"	<p>'Silver Carpet' is a hybrid of the species which is flowerless.</p> <p>It won't seed itself all over the garden and will perform best in a dry, well-drained soil.</p> <p>Leaves are evergreen in warm climates, but will depreciate considerably in harsh winters. This cultivar is perhaps most noted for the fact that it rarely produces flower spikes.</p> <p>Dense rosettes of woolly, tongue-shaped, gray-green leaves (to 4" long) spread by runners.</p>

Perennial	Lenten Rose	Helleborus x 'Brandywine'	Partial Shade to Shade	Winter to Spring	12-18"	<p>Helleborus hybridus 'Brandywine' is an introduction by North Creek Nurseries from the famous Hellebore breeder David Culp. This series includes doubles and anemones with colors of dark reds, spotted pinks, picotees and apricots.</p> <p>Hellebores are evergreen, long lived, tough plants, desirable through all seasons. Leathery dark green leaves frame nodding 3-4" wide flowers which last up to 10 weeks.</p> <p>Plant in rich organic soil and clumps will establish quickly. Cut back winter damaged leaves to allow new growth.</p>
Perennial	Lyre-leaved Sage	Salvia lyrata 'Purple Knockout'	Sun to Partial Shade	Summer	18"	<p>The lyre-leaved sage is native to the woods edge and tall meadows of the eastern United States.</p> <p>A prized foliage plant full of intrigue. Compact basal rosettes of shiny burgundy leaves turning to deep purple in summer and then to red in the fall with spikes of pale lilac blue flowers. Attracts the bees and butterflies.</p> <p>Very easy to grow in most soil types and will self sow to spread and become a dense groundcover - a great native substitute for <i>Ajuga reptans</i>.</p>

Perennial	Maidenhair Spleenwort	Asplenium trichomanes	Partial Shade to Shade	Year Round	4-8" x 12"	<p>This small, fragile-looking evergreen native fern is incredibly tough once established. Its diminutive fronds form adorable short tufts of green and appear like miniature versions of our common sword fern. Maidenhair Spleenwort is very cute and once it is established it is even easy to grow in dry shade. Performs well in light, open, dappled, or deep shade.</p> <p>It grows fastest in rich well-drained soil and will flourish in most soil types except those that become water logged. Drought tolerant once established. Prefers rocky conditions and does well planted in the cracks and crevices of a rock wall.</p>
-----------	--------------------------	--------------------------	---------------------------	------------	------------	---

Shrub	Maple-leaved Viburnum	Viburnum acerifolium	Sun to Partial Shade	Early Summer	3-6' x 2-4'	<p>Native to eastern North America, this viburnum is a relatively small, rounded, suckering, deciduous, woodland shrub which has long been cultivated for its attractive summer flowers and foliage. The leaves provide excellent rose-purple fall color and contrast with the mature dark fruits.</p> <p>Naturalize in open woodland areas. Also may be used in shrub borders, foundations or hedges. The relatively low-growing plants provide good nesting and escape cover for birds and small mammals.</p> <p>The plants will thrive in moist soils and a range of light conditions but they are a good choice for dry soils in deep shade.</p>
-------	--------------------------	----------------------	-------------------------	-----------------	-------------	--

Perennial	Mayapple	Podophyllum peltatum	Partial Shade to Shade	Spring	12-18"	<p>Mayapple is a rhizomatous, native wildflower that occurs in both moist and dry woodland areas. From a single stem, each plant grows 12-18" tall and features one or two, deeply-divided, palmately-lobed, umbrella-like, pale green leaves (to 12" diameter).</p> <p>Plants with only one leaf will not flower. From the crotch (leaf axil) on two-leafed plants, a single, nodding, waxy, 6-9-petaled, white flower (3" diameter) appears on a short, thin stem in early spring. Flowers are quite showy, but usually hidden by the umbrella-like leaves. Each flower gives way to an edible, fleshy, greenish fruit (mayapple) which turn golden when ripe and may be used to make preserves and jellies.</p> <p>Leaves and roots are poisonous, however.</p>
-----------	----------	----------------------	---------------------------	--------	--------	--

Perennial	Meadow beauty	<i>Rhexia virginica</i>	Partial Shade to Shade	Summer	1-2'	<p>Meadow beauty or Handsome Harry is a 2 ft. succulent, hairy perennial with bright-green, oval leaves and showy flowers in loose, nearly terminal clusters. Flowers are strikingly beautiful with showy pink-purple petals and contrasting bright yellow stamens.</p> <p>Members of this genus have a distinctive urn-shaped fruit that Thoreau once compared to a little cream pitcher. The narrowly winged stem is four-sided with flat faces.</p> <p>Prefers wet peat or sandy, acid soils.</p>
Perennial	Mexican Feather Grass	<i>Nassella tenuissima</i>	Sun to Partial Shade	Summer	1-2' x 12"	<p>Mexican feather grass is one of the finest textured of the ornamental grasses. It grows in a dense fountainlike clump with slender, wiry culms 1-2' tall. Its hairlike foliage moves with the slightest breeze. Flowers bloom a greenish color in summer to late fall and then matures to a golden color.</p> <p>Use it in rock gardens and as an accent to plants with a bolder texture.</p> <p>Mexican feather grass is easy to grow as long as the soil has excellent drainage. It is highly drought tolerant.</p>

Evergreen	Mountain Laurel	Kalmia latifolia 'Bullseye'	Partial Shade to Shade	Year Round	6-10'	<p>The deep purplish cinnamon colored buds open to a creamy blossom, in May-June, with a broad purple band around the inside with a white throat and edge. The new growth is reddish bronze.</p> <p>The mountain laurels are excellent broadleaf evergreens for the shady border. It is a native shrub, which can be naturalized in a wooded setting and requires acidic, moist well-drained soil.</p>
-----------	-----------------	--------------------------------	---------------------------	------------	-------	--

Evergreen	Mountain Laurel	<i>Kalmia latifolia</i> 'Sarah'	Sun to Partial Shade	Late Spring	4-5' x 4'	<p>Mountain laurels are beautiful slow growing evergreen shrubs. 'Sarah' has the reddest flower of all the cultivars and a dense upright habit with an overall rounded shape. The buds of this flower are actually red, then a pinkish-red when open.</p> <p>Purplish red new stems. Flowers open over a two week period in late May and early June. Tends to grow best at the edge of the woods and areas protected from drying winds.</p> <p>This species is tolerant of shearing and pruning which is best done just as flowering season ends to enable the new growth to set flower buds for the next year. When allowed to grow naturally, it matures to a large multistem plant with thick trunks and picturesque branching. Moderately drought tolerant once established. Cultivars with highly colored flowers produce best color in full sun.</p> <p>It does not like to be over-fertilized.</p>
Evergreen	Mountain Laurel	<i>Kalmia latifolia</i> 'Yankee Doodle'	Partial Shade	Late Spring	7-15' x 7-15'	<p>This cultivar has red buds that open in May-June to an irregular maroon-banded flower with a large white throat. The foliage is yellowish green.</p> <p>Mountain Laurel is an excellent broad-leaved evergreen for shady borders. It requires cool, acid, moist, well-drained soil.</p>

Perennial	Mountain Mint	<i>Pycnanthemum muticum</i>	Sun to Partial Shade	Summer	24-36"	<p><i>Pycnanthemum muticum</i> blooms are in small clusters and slightly pink in color with whitish bracts that are also decorative. Blooms July through September.</p> <p>It is a slow spreader in hot dry climates even with adequate moisture. Water weekly until established. Bees and butterflies love this plant.</p>
Perennial	New York Aster	<i>Symphotrichum (Aster) novi-belgii</i>	Sun to Partial Shade	Early Fall	3 -4"	<p>Another great plant for moist areas, this bushy plant grows well in any well-drained soil type in full sun or part shade. Producing a profusion of flower blooms in late fall and provides food and shelter for wildlife!</p>
Shrub	Ninebark	<i>Physocarpus opulifolius 'Diablo'</i> Diabolo™	Sun to Partial Shade	Summer to Fall	5-10' x 5-10'	<p>This shrub is grown mostly for its coarse reddish, purplish leaves which differs from the species' medium green color.</p> <p>It does have flowers in May-June that put on an effective display of 1 to 2" white are pinkish corymbs. This cultivar is a Pennsylvania Horticulture Society Gold Metal Plant.</p>

Perennial	Nuttall's Rayless Goldenrod	<i>Bigelowia nuttallii</i>	Sun to Partial Shade	Year Round	3-8" x 5"	<p><i>Bigelowia nuttallii</i> forms tiny tufts of fine green foliage like a miniature blue star. Most of the leaves are growing e near the ground, with smaller and narrower leaves on the stems. From mid-summer through autumn, soft clusters of bright yellow flowers - very attractive to honeybees - float over small tufts of soft green, thread-like foliage.</p> <p>This tough evergreen plant is well adapted to sunny, dry, and exposed areas. A North American native perennial, it can be found in very scattered areas from central Georgia west to East Texas in wet acidic savannahs and seeps, and exposed, dry sandy sites.</p>
-----------	-----------------------------	----------------------------	----------------------	------------	-----------	--

Shrub	Oakleaf Hydrangea	Hydrangea quercifolia 'Flemygea' Snow Queen™	Sun to Partial Shade	Summer to Winter	4-6' x 6-8'	<p>Hydrangea quercifolia is an upright, suckering, deciduous, multi-stemmed, shrub native to the U.S. from Georgia to Louisiana.</p> <p>Snow Queen has an upright rounded habit, featuring elongated, conical clusters (4-12") of white flowers which slowly turn pinkish purple. Long late spring to summer bloom period. Flower panicles are excellent in arrangements.</p> <p>Distinctive, deeply lobed, somewhat coarse, oak-like, deep green leaves (to 8") turn attractive shades of bronze, maroon or purple in autumn. Mature stems exfoliate to reveal a rich brown inner bark, attractive in winter.</p> <p>Best grown in fertile, medium moisture, well-drained soil.</p>
Shrub	Oakleaf Hydrangea	Hydrangea quercifolia 'Pee Wee'	Sun to Partial Shade	Early Summer	3-4'	<p>Compact form of the species reaching a height of only 3-4'. The flowers are smaller (3-4" long). An excellent plant for the small garden. The fall foliage can be rose to red-purple.</p> <p>Moist, well-drained soil is preferred.</p>

Shrub	Oakleaf Hydrangea	Hydrangea quercifolia 'Ruby Slippers'	Sun to Partial Shade	Spring to Fall	3.5' x 5'	<p>In summer a profusion of exceptionally large, 9-inch-long flower clusters are showcased against the dark green, deeply lobed, oak-like leaves of this exceptional hydrangea.</p> <p>Robust blossoms open white, quickly age to deep pink, and remain upright even after heavy rains. The rich green foliage turns a brilliant mahogany-red in fall.</p> <p>The compact form of 'Ruby Slippers' is well suited for small landscapes. It is ideal used in mass plantings, hedges, and mixed borders. This is an introduction from the U.S. National Arboretum.</p>
-------	-------------------	--	-------------------------	----------------	-----------	---

Perennial	Ohio Spiderwort	Tradescantia ohiensis	Sun to Partial Shade	Late Spring	3' x 2'	<p>This species of spiderwort is a clump-forming herbaceous perennial which grows up to 3' tall with dark bluish-green, arching, grass-like leaves which are folded lengthwise forming a channel or groove. Clusters of blue, three-petaled flowers bloom from late May into early July. Each flower opens up for only one day. Can self-seed and become somewhat aggressive in ideal growing conditions. It is commonly found in prairies, wood margins, meadows, along roadsides, or in waste areas.</p> <p>Easily grown in average, dry to medium, well-drained soil in full sun to part shade. Very tolerant of part shade, but bloom may be less profuse. Prefers moist, acidic, sandy soil. Cut back to 6-12" in mid-summer to encourage new growth and a possible fall bloom.</p>
-----------	-----------------	-----------------------	----------------------	-------------	---------	--

Perennial	Ornamental Raspberry	Rubus calycinoides	Sun to Partial Shade	Spring to Summer	6-12" x 18-24"	<p>Very attractive semi-deciduous ground cover. It has 1 inch, 3-lobed, shiny, dark green leaves that are finely puckered and leathery and have smooth light tan undersides.</p> <p>Leaves turn a beautiful dark bronze for the winter, falling off only when temperatures go below 15 degrees or so.</p> <p>White- light purple flowers in late spring followed by orange-raspberry fruits.</p> <p>Nearly evergreen, insect and pest free. Very durable! Wonderful ground cover around shrubs or perennials.</p> <p>Water well on planting and until established, then drought tolerant.</p>
-----------	----------------------	--------------------	----------------------	------------------	----------------	---

Shrub	Pagoda Dogwood	Cornus alternifolia	Partial Shade	Spring to Fall	25'	<p>Cornus alternifolia is a small deciduous tree with horizontal or tiered branching. Shape is often somewhat irregular, but can be more or less rounded and is loose and open.</p> <p>Leaves are medium to dark green with a mix of yellow with reddish purple in the fall.</p> <p>Small, white fragrant flowers, borne in flat clusters, occurs in late May and early June. Flowering can be described as moderately showy.</p> <p>The fruit changes from green to blue-black, passing through a reddish stage. The showy color develops in late July and August, but fruits don't persist long. Fruit stalks turn a pleasing coral red.</p> <p>Bark</p> <p>older bark is gray brown and lightly ridged and furrowed younger bark is smooth and reddish brown</p>
-------	----------------	---------------------	---------------	----------------	-----	---

Perennial	Partridge Berry	<i>Mitchella repens</i>	Part to Full Shade	Year Round	1-2"	<p>Our native partridgeberry forms a wonderful groundcover in the woodland garden. In the winter the leaves of this evergreen plant provide a perfect setting for the small red berries. Pairs of small white flowers are fragrant and bloom in spring to early summer.</p> <p>Prefers moist, shady soil.</p>
Perennial	Pennsylvania Sedge	<i>Carex pennsylvanica</i>	Sun to Shade	Spring	6-8" x 6-8"	<p>This native sedge forms short clusters and spreads slowly by rhizomes to become a lush carpet. It provides an excellent seasonal cover for small foraging songbirds and mammals. Reddish brown thimble-like flowers top the narrow fine textured leaves in spring.</p> <p>Foliage is green, red to purple. Thrives in dry soil and remains lush in the shade of deciduous trees. It is deer resistant.</p>

Perennial	Pink Turtlehead	Chelone lyonii 'Pink Temptation'	Partial Shade to Shade	Summer	16" x 165"	<p>Turtleheads are native wildflowers that adapt beautifully to garden conditions. Pink Temptation forms an upright, bushy mound of shiny green foliage which turns bronzy-green early in the season. In late summer, plants produce upright stems of large rosy-pink hooded flowers. Flowers from July to September.</p> <p>Best in a moist or wet site, they also adapt well to average perennial border conditions. Terrific at the waterside. Good for cutting. Showy and long lived. Attractive to butterflies. Plants are easily divided in spring.</p> <p>Companion plant with fox sedge, royal ferns, obedient plant and Cardinal flower.</p>
Shrub	Possomhaw Viburnum	Viburnum nudum 'Bulk' Brandywine™	Sun to Partial Shade	Spring to Fall	5-12' x 5-12'	<p>Dutch plantsman Mark Bulk introduced this gorgeous plant with glossy green leaves, white flowers and multitudes of vivid pink to blue berries. Leaves turn a dark maroon red in autumn. Plant with Viburnum 'Winterthur' as a companion as planting two distinct clones close together results in huge crops of berries.</p> <p>Will grow in a wide range of soil conditions from well drained to even boggy soil. Plant in groups for cross pollination and subsequent wonderful fruit display.</p>

Perennial	Praire Trillium	<i>Trillium recurvatum</i>	Partial Shade to Shade	Mid Spring	1' x 1'	<p>Occurring in woodlands throughout the prairie states, <i>Trillium recurvatum</i> is one of the least known of our native trilliums. Its curious maroon-colored flowers are nestled against its classically arranged three leaves. The small green sepals are reflexed - hence its specific epithet. The reddish brown flowers probably attract beetles and flies, which feed on the pollen. The handsome speckled leaves are most likely an adaptation to deer predation as this type of pattern may help to camouflage the plant with the surrounding forest floor.</p> <p>The prairie trillium is an easily-grown species, thriving in moist organic, well-drained woodland soils. As a result, it is ideal for wildflower gardens, native plant gardens, and shade gardens. It mixes well with other shade perennials that are not too aggressive - such as ferns and smaller hostas.</p>
-----------	-----------------	----------------------------	---------------------------	------------	---------	---

Perennial	Prairie Coneflower	Ratibida columnifera 'Red Midget'	Sun to Partial Shade	Summer to Fall	36" x 36"	<p>For a showy native plant that will flourish in the dry sunny border, there is no other perennial better than the prairie coneflower. Fun, unique flowers dance above mounds of fine green foliage from June until frost.</p> <p>This plant is grown from seed, so there will be variation in the red/yellow ratio in the flowers. A native prairie plant, this dwarf variety of the species performs exceptionally well in hot and dry conditions.</p> <p>A must for the wildlife garden, it attracts pollinators and birds.</p>
Perennial	Purple Avens	Geum triflorum	Sun to Partial Shade	Mid Summer	15" x 18"	<p>Purple avens produces charming, nodding pink flowers in the spring. These are followed by flowing silky seedheads that create a gauzy effect that resembles smoke hovering close to the ground, hence its other common name, Prairie Smoke.</p> <p>Spreading slowly from its roots, Prairie Smoke can be used as a small-scale groundcover. Grows easily in lean-to-average fertility garden soils.</p>

Perennial	Purple Coneflower	Echinacea purpurea	Sun	Summer to Fall	3-4'	<p>This has been one of the backbone plants of the perennial border for 200 years. The dark green 4-8" long leaves are, coarse, serrated and have short, stiff hairs. The centers of the flowers are cones of orange-brown, and are surrounded by bright pink/purple petals that droop slightly toward the hairy stem.</p> <p>These are tough, easy plants. Give them average to lean soil and sun.</p>
Perennial	Purple Wakerobin	Trillium erectum 'Beige'	Partial Shade to Shade	Spring	12" x 12"	<p>'Beige' is the creamy yellow flowered version of Purple Trillium.</p> <p>Trilliums make elegant understory plants when grouped in woodland areas. They have 3 leaves, often beautifully mottled, topped with a 3-petaled flower in early to mid spring.</p> <p>Provide rich, moist, well-drained soil in a shady area. Plants go dormant in late summer or early fall and may be divided at this time.</p>

Shrub	Redosier Dogwood	Cornus sericea (stolonifera) 'Arctic Fire'	Sun to Partial Shade	Year Round	4-5' x 4-5'	<p>Arctic Fire® dogwood has beautiful red stems and a compact habit and is at its best in the winter sunlight. This dwarf variety reaches just 3-5' feet rather than the 8-10' of conventional red-twig dogwood.</p> <p>Bright red stems in winter add color to the landscape. The best red color appears on one and two year old stems; older stems will turn corky and brown.</p> <p>Its smaller size makes this variety a great breakthrough for smaller gardens or residential landscapes. Tolerates a wide range of soil and light conditions. Native to North America.</p> <p>Synonymous with and formerly known as Cornus stolonifera.</p>
Shrub	Redosier Dogwood	Cornus sericea (stolonifera) 'Cardinal'	Sun to Partial Shade	Winter	8-10' x 8-10'	<p>Cornus sericea 'Cardinal' is a loose broad spreading multi-stemmed shrub with lush green leaves in summer, purple red in fall. Flowers are creamy white in May and June. The stems of 'Cardinal' are magical, cherry-red in fall, progressing to iridescent coral-pink in winter then to pale chartreuse green in spring. What a show!</p> <p>The plant is easily grown in rich moist soils. Combine with other shrubby dogwoods with red or yellow stems for a winter picture.</p>

Perennial	Roundleaf Alum Root	<i>Heuchera micrantha</i> 'Palace Purple'	Sun to Partial Shade	Spring to Fall	12"	<p>This selection was the first of many purple-leaved Coral Bells, and is still an excellent choice for towards the edge of the border, or in containers and tubs. Plants form a low mound of maple-shaped leaves, from bronzy-green to rich purple-red.</p> <p>Spikes of small creamy-white flowers appear in early summer. In hot summer areas a part shade location will help to prevent the leaf color from fading. Evergreen in mild winter areas, but plants may be clipped hard in early spring.</p> <p>Division is not always easy, but can be attempted in spring. A former Perennial Plant of the Year for 1991.</p>
Perennial	Royal Fern	<i>Osmunda regalis</i>	Shade	Spring to Fall	3'	<p>Bright brown plumes emerge from the ground in spring. Leafy, lance-shaped fronds are attractive all season long.</p> <p>Prefers an acid soil and a lot of moisture.</p>

Perennial	Sensitive Fern	<i>Onoclea sensibilis</i>	Partial Shade to Shade	Spring to Summer	1' - 3'	<p>Sensitive fern has medium to large-sized ferns; large, deeply pinnatifid fronds and spherical spore-bearing bodies borne on a separate stalk.</p> <p>The fronds die quickly with the first autumn frosts, which is why the plant has gained its common name of the sensitive fern. This species is reported to be poisonous to livestock and rarely, if ever, is troubled by browsing deer.</p> <p>It is found in wet woods, along streams, riverbanks, swamps and bogs; uncommon in forested environments.</p> <p>The preference is partial sun to light shade, moist conditions, and soil that is loamy, silty, or sandy.</p>
Evergreen	Sheep Laurel	<i>Kalmia angustifolia</i>	Sun to Partial Shade	Summer	3' x 6'	<p>Looking for a flowering evergreen shrub that would tolerate most soil conditions (bogs to sandy areas) and would also attract pollinators? Look no further than this native laurel that blooms in spring. Also called sheep laurel, this low growing shrub blooms in June and July. Flowers are small in comparison to the other species <i>Kalmia latifolia</i>. Leaves are evergreen and are tinged blue.</p> <p>Warning: poisonous if ingested.</p> <p>Drought tolerant once established.</p>

Perennial	Showy Trillium	Trillium grandiflorum	Partial Shade	Spring	10-12"	Broad, green, heart-shaped leaves with upright, open-faced, large showy flowers signal the coming of a new season. The easiest trillium to satisfy in any garden soil.
Tree	Silky Camellia	Stewartia malacodendron (virginica)	Shade	Spring to Fall	10-18' x 15-25'	<p>The Silky Camellia is a beautiful flowering deciduous shrub or small tree native to North Carolina. White Camellia-like flowers have centers of purple stamens and blue anthers. The bark is smooth cinnamon color and exfoliates in strips. Silky hairs are found on the undersides of the dark green leaves and the young reddish-brown twigs. The fruit is a small oval capsule.</p> <p>It prefers rich loamy, moist, well-drained soils, and the shelter of woodlands. The plant thrives in the morning sun but needs deep shade during most of the day. The flowers attract bees and butterflies to collect pollen.</p> <p>Consider it as an accent or specimen in a shaded and sheltered garden. It is best to locate it in its final growing spot.</p>

Shrub	Silky Dogwood	Cornus amomum	Sun to Partial Shade	Late Spring	6'-12' x 6'- 12'	<p>A great shrub for wildlife! White flat-topped flower clusters attract butterflies and pollinators while the blue fruits in late summer are an important food source for many songbirds. Reddish-brown stems add winter interest.</p> <p>Does particularly well in moist areas, so it would be a great addition to your yard for those soggy areas that are difficult to find good plantings for. Its branches have a tendency to root in wet soil, creating thickets which are great for wildlife habitat. Good selection for moist woodlands, naturalized areas, along streams/ponds or for erosion control.</p>
-------	---------------	---------------	-------------------------	-------------	---------------------	--

Shrub	Smooth Hydrangea	Hydrangea arborescens 'Abetwo' Incrediball™	Partial Shade	Summer	4-5' x 4-5'	<p>'Abetwo', commonly sold in commerce under the trade name of INCREDIBALL, is a new variety of 'Annabelle' featuring even larger globular flower heads with 4 times the flowers per head. With the added bonus of having much thicker upright stems, the flower heads stay upright even after they are rain soaked.</p> <p>The densely packed fertile flowers on the flower heads of INCREDIBALL emerge lime green, but mature to pure white. Flowers bloom in early June for up to two months. Flowers contrast well with the dark green leaves. Pruning stems back to the ground in late winter each year helps promote stem vigor. Easily grown in average, medium moisture, well-drained soil in part shade. Tolerates full sun only if grown with constant moisture.</p>
-------	------------------	---	---------------	--------	-------------	--

Shrub	Smooth Hydrangea	Hydrangea arborescens 'Annabelle'	Partial Shade	Summer	3-5' x 3-5'	<p>'Annabelle' is one of the hardiest and finest of the native deciduous flowering shrubs. Flowers are very large globose clusters 4-6" across and are produced on new wood starting light yellow-green turning a creamy white. Blooms may persist for two months in cool weather.</p> <p>Cut flowers at the base and hang to dry for winter bouquets.</p> <p>Use massed, as a low hedge, or in shrub borders. Cut to the ground in late winter to produce new growth.</p> <p>Prefers rich, moist, well-drained, porous soil.</p>
-------	------------------	---	---------------	--------	-------------	---

Shrub	Smooth Hydrangea	Hydrangea arborescens 'NCHA6' Invincibelle Garnetta®	Sun to Partial Shade	Summer to Fall	30" x 30"	<p>Lusciously full mop head pink flowers are only one of the qualities that make Invincibelle Garnetta® so special. It also boasts supportive, sturdy stems (no blooms laying on the ground here!), a useful compact size, and reblooming ability for months of flowers. Blooming a bit later, it's a fantastic season-extender.</p> <p>A minimum of six hours of sun helps produce the strongest stems and the most abundant flowers. Prune Invincibelle hydrangeas in early spring. Remove any dead wood and cut the entire plant back by about one-third its total height. A 2-3" layer of shredded bark mulch is recommended. Fertilize in early spring, after the ground has thawed but before new growth.</p>
-------	------------------	--	-------------------------	-------------------	-----------	---

Perennial	Speedwell	Veronica longifolia 'Alllove' First Love™	Sun to Partial Shade	Spring to Summer	10-15" x 18-20"	<p>Veronica longifolia 'Alllove' has brilliant, nearly fluorescent pink flowers packed into tapered spikes emerge from dense clumps, and provide fantastic summer color.</p> <p>Spot into rock gardens, borders, containers, or other sunny spots in the landscape, or plant en masse for a sensational effect. Excellent for cut flower arrangements.</p> <p>Features include: Attracts Butterflies, Attracts Hummingbirds, Clump Forming, Dense Habit, Easy Care, Extreme Cold Hardiness, Compact Form.</p>
-----------	-----------	--	-------------------------	---------------------	--------------------	---

Shrub	Spicebush	<i>Lindera benzoin</i>	Sun to Partial Shade	Spring to Fall	6-12' x 6-12'	<p>A deciduous shrub native to the Northeast, Spicebush is good for naturalizing or for the garden border. Greenish-yellow flowers wake up the spring landscape in April. Small red fruits, on the female plant, are especially enjoyed by birds in the Fall. Female plants need a male pollinator in order to set fruit, however.</p> <p>Fall color is a good clear yellow, especially when grown in full sun. Stems, fruit and leaves emit a fragrance similar to "Old Spice" when bruised. The larva (caterpillar) of the spicebush swallowtail butterfly feeds on the leaves of this shrub. <i>Lindera</i> is named for the Swedish botanist, Johann Lindler.</p> <p>Prefers a moist, acid, well-drained soil. Tolerates dense shade and clay soils.</p>
Perennial	Spotted Geranium	<i>Geranium maculatum</i>	Sun to Partial Shade	Mid Spring	1-2'	<p>Blooming earlier than most geraniums, this woodland native can be found throughout eastern and central North America. The airy clusters of violet-rose flowers are borne above high foliage.</p> <p>It is adaptable to many sun and soil conditions.</p>

Perennial	Spotted Joe Pye Weed	Eupatorium maculatum 'Gateway'	Sun to Partial Shade	Late Summer	50-64"	<p>'Gateway' is an unmatched specimen plant. Its large deep rose flower heads on wine stems are butterfly magnets. Leaves are whorled, serrated and lance-shaped.</p> <p>Great near water and for naturalizing it is native to the eastern U.S.A.</p> <p>This is a featured plant in Tyler's Stopford Family Meadow Maze.</p>
Perennial	Stonecrop	Sedum 'Blue Carpet'	Sun to Partial Shade	Summer	1-2"	<p>Great for the rock garden or a path edging, this mat forming creeper with silvery blue foliage will add a bit of coolness to the garden. The foliage persists throughout the season while the starry pink to white blooms give their show in early to mid summer.</p> <p>Prefers gravelly, well-drained soil.</p>

Perennial	Stonecrop	Sedum ternatum 'Larinem Park'	Sun to Partial Shade	Late Spring	4" x 23"	<p>The evergreen creeping selections of Stonecrop are excellent groundcover plants, particularly for hot, dry sites with poor soil. Larinem Park forms a low carpet of small, rounded green leaves, spreading to form a thick patch. Clusters of white starry flowers appear in late spring.</p> <p>A fast grower, this is best kept away from slower alpine plants that it might smother. Also a good choice for tubs and mixed containers. Easy to propagate; simply break pieces off in early summer and stick them in the ground.</p> <p>Larinem Park is more tolerant of shade and moisture than other Sedum species.</p>
Shrub	Summersweet Clethra	Clethra alnifolia 'Ruby Spice'	Sun to Partial Shade	Year Round	6-8'	<p>'Ruby Spice' clethra is an oval, round-topped, erect, dense shrub, often suckering to form dense colonies. Fragrant pink flowers are borne in 2-6" long clusters on the tips of branches in July and August. Lustrous medium to deep green leaves turn pale yellow to rich golden brown in fall.</p> <p>Certainly one of the best native shrubs for summer color and fragrance. Prefers a moist, acid soil that has been supplemented with organic matter; grows naturally in wet places. Tolerant of salty conditions.</p>

Shrub	Summersweet Clethra	Clethra alnifolia 'Sixteen Candles'	Sun to Partial Shade	Summer	3-3.5'	<p>This cultivar was selected from a seedling of <i>Clethra alnifolia</i> 'Hummingbird'. It exhibits the compact habit and strong stem structure of its parent plant.</p> <p>It holds its flowers upright like candles on a cake which inspired its name. They are white coming in late June and early July. The spent inflorescences add interest through winter.</p>
Perennial	Swamp Milkweed	Asclepias incarnata	Sun to Partial Shade	Early Summer	3-4'	<p>Swamp milkweed, true to its name, prefers consistently moist soil, but performs admirably in average, well-drained gardens as well.</p> <p>Full sun is best and some shade is tolerated. Clusters of upturned pink flowers draw butterflies in June and July.</p>
Tree	Swamp White Oak	Quercus bicolor	Sun to Partial Shade	Fall	50' x 60'	<p>Swamp White Oak is a deciduous tree with a broad, rounded crown. The dark, shiny green leaves are silver on the underside. Fall color is usually yellow, but sometimes reddish purple. Though ornamentally insignificant, flowers bloom in April attracting pollen-seeking insects that attract migrating vireos, tanagers and warblers in search of a meal.</p> <p>Large acorns mature in early fall providing food for deer, wild turkey, black bear, fox and gray squirrels. Indigenous to moist, bottomland locations, this oak has surprisingly good drought resistance.</p>

Perennial	Sweet White Violet	<i>Viola blanda</i>	Partial Shade	Mid Spring	6" x 12"	<p>Looking for a native perennial that would thrive in your woods amongst ferns and foam flowers? Is fragrance on your list too? Try this white flowering violet. Sure to colonize as it grows with runners if it is happy.</p> <p>Grows well in wet woods and beside brooks. Great companion with royal ferns, swamp azaleas and sedges.</p> <p>Violets are prime caterpillar host plants for many of the Fritillary butterflies.</p>
Evergreen	Sweetbay Magnolia	<i>Magnolia virginiana</i>	Sun to Partial Shade	Spring	10-20' x 10-12'	<p>The sweetbay magnolia is a lovely native specimen tree with lustrous green foliage with a silvery underside. Fragrant, creamy white, lemon scented flowers, 2-3" in diameter, are borne in early June and produced sporadically through most of the summer. Seedpods are 2" long. The dark red seeds emerge from the pods and persist there, remaining attractive until they're dropped or picked off by animals.</p> <p>Different from most magnolias in that it does well in wet and even swampy soils; also tolerates shade; requires acid soil.</p>

Perennial	Tall Verbena	Verbena bonariensis	Sun to Partial Shade	Summer	2-4'	<p>This self-seeding tender perennial will reach about 3' in our area. The lance-shaped leaves are borne at the base of the plant and topped by erect, branching stems with 2" wide clusters of 1/4" wide purple flowers from midsummer to fall.</p> <p>Attracts butterflies and hummingbirds to your garden. Use in beds, borders and containers.</p> <p>Best in full sun with average, well-drained soil that is evenly moist.</p>
Perennial	Threadleaf Coreopsis	Coreopsis verticillata 'Moonbeam'	Sun to Partial Shade	Summer	12-18"	<p>'Moonbeam' is a spreading clump of extremely narrow, thread-like, medium green leaves are topped with an endless supply of pale yellow, daisy-like flowers the color of moonbeams.</p> <p>Perennial Plant Association Plant of the Year, 1992. Performs well in dry conditions and is attractive to butterflies</p>
Perennial	Toad Trillium	Trillium luteum	Partial Shade	Spring	10-12"	<p>Wide heart-shaped leaves are neatly mottled through maturity, holding in their tri-parted middle a vertical lemon fragrancd flower. Native from northern Georgia to Southern Kentucky and from eastern Tennessee to western North Carolina.</p>
Perennial	Toad Wakerobin	Trillium sessile	Partial Shade	Mid Spring	10"	<p>Quite rounded leaves open with a mottling which slowly lusher. Narrow sepaed flowers are held vertical and may sometimes vary within a color range of marooney-greenish-yellow. Native.</p>

Perennial	Trillium	Trillium cuneatum	Partial Shade to Shade	Mid Spring	12-18"	<p>Trillium cuneatum is a robust, erect, clump-forming perennial with stalkless, widely ovate-rounded, mid-green leaves, marked pale or silver-green. Produces musk-scented, dark maroon flowers with wedge-shaped petals and purple-tipped, olive-green sepals are borne above the leaves. Flowers in early March to mid April.</p> <p>Establish rhizomes in shady location where soil is rich and moist.</p> <p>Trillium cuneatum is native to parts of the southeastern United States.</p>
Vine	Trumpet Honeysuckle	Lonicera sempervirens 'Major Wheeler'	Sun to Partial Shade	Summer to Fall	3-8' x 1-10'	<p>This native honeysuckle begins flowering in June and continues into fall--and this one is really red. Garden trials have demonstrated that this is the most profuse bloomer of its species and with its mass display of thin tubular, red-orange flowers from late spring through the end of summer and highly disease resistant foliage, 'Major Wheeler' is a low care, high color addition to the landscape.</p> <p>Needs a little support in the garden, or let it scramble over a nearby large shrub. Found in sunny clearings and along the edges of woodlands, though it is fuller and more floriferous in full sun. Will grow in most soil types. Prefers a moist - well drained soil.</p>

Perennial	Twin Leaf	Jeffersonia diphylla	Partial Shade	Spring	12-18"	<p>This clump-forming perennial is suitable for woodland, shade, or rock gardens. Basal leaves have two large lobes, hence the common name "Twinleaf." Fruit pods, pear-shaped and ornamental.</p> <p>The genus name Jeffersonia is given to this plant in honor of President Thomas Jefferson.</p>
Shrub	Vernal Witchhazel	Hamamelis vernalis 'KLMNN' Grape Fizz™	Sun to Partial Shade	Year Round	4-5' x 4-5'	<p>Grape Fizz™ Witch hazel is an introduction by Roy Klehm. The ribbon-like winter flowers, February-March, are uniquely reddish purple and fragrant. They are borne on bare branches and provide important food to winter pollinators on warm days. The foliage is green, turning to shades of orange and yellow in fall.</p> <p>Hamamelis vernalis Grape Fizz™ has a bushy habit and grows 4 to 5 ft. tall and wide.</p> <p>Easily grown in average, medium moisture, well-drained soils in full sun to part shade. Best flowering is in full sun. Prefers moist, acidic, organically rich soils.</p>

Perennial	Virginia Bluebells	<i>Mertensia virginica</i>	Partial Shade to Shade	Spring	12-24"	<p>One of our most beloved woodland wildflowers, the pink buds open to clear sky-blue flowers in nodding clusters. The emerging leaves are purple-grey, turning blue-green at maturity. The entire plant goes dormant in Mid-June.</p> <p>Prefers moist soils, but will tolerate dry conditions when established; will self-sow.</p>
Shrub	Virginia Sweetspire	<i>Itea virginica</i> 'Henry's Garnet'	Sun to Shade	Spring to Fall	3-5'	<p>This shrub puts out plenty of fragrant, little white flowers in June. The leaves a lustrous medium to dark green in summer and put on an autumn display of dazzling purples and crimsons.</p> <p>'Henry's Garnet' is a superb selection from the Swarthmore College campus. Both the fall color and flowers are superior to the species.</p>
Shrub	Virginia Sweetspire	<i>Itea virginica</i> 'Sprich' Little Henry™	Sun to Partial Shade	Spring to Fall	3-4'	<p>This handsome native shrub possesses a round, mounded habit. The selection Little Henry™ is more compact than the species; better suited to smaller gardens. Flower clusters, produced in June, are white, fragrant and 3-4" long.</p> <p>Fall foliage is an excellent red-purple color and often persists into early winter. Prefers moist, fertile soil and in the wild exists in wet places.</p>

Shrub	Virginia Witchhazel	<i>Hamamelis virginiana</i>	Sun to Partial Shade	Fall	20' x 15'	<p>Native understory tree or large shrub. Bloom time is October/November with yellow, spider-like flowers with a light, spicy fragrance. It is the last woody plant to flower. Excellent for naturalistic areas as well as shady areas.</p> <p>Likes full sun to partial shade and prefers a moist, cool, acidic soil. Tolerates clay soil and poor drainage. It forms a small tree or shrub with arching branches, usually growing in dense multi-stemmed clumps reaching up to 20 feet tall.</p>
Perennial	Waxbells	<i>Kirengeshoma palmata</i>	Partial Shade	Summer	3-4'	<p>A shrub-like perennial with large palmately lobed foliage. The 1" long, pale-yellow, waxy, bell-shaped flowers are found in the axils of the topmost leaves in late summer and fall. Prefers moist, rich soil in shade.</p> <p>Allow it to remain undisturbed for as long as possible.</p>

Perennial	White Baneberry	Actaea (Cimicifuga) pachypoda	Partial Shade to Shade	Summer to Fall	30" x 30"	<p>White Baneberry is a shade loving native woodland perennial. Clumps of lacy foliage emerge in the spring followed by fragrant clusters of small white flowers that float above the foliage. In fall they develop clusters of eye-catching white fruit borne on red stems.</p> <p>White baneberry prefer moist, rich soil; water in dry periods. They are generally not bothered by any pests or diseases.</p> <p>The fruits of this plant are poisonous if ingested.</p>
Shrub	White Meadowsweet	Spiraea alba var. latifolia	Sun to Partial Shade	Summer	2-4' x 2-4'	<p>Spiraea alba var. latifolia is an underused, lovely native shrub for moist, sunny sites. It flowers in summer with white, sometimes pink, fragrant blossoms. Glossy green foliage turns yellow in fall.</p> <p>Easy to grow in medium to moist sunny sites. Tolerant of a wide variety of soil types. Responds well to pruning.</p> <p>Meadowsweet is a host plant for the larvae of the spring azure butterfly and a source of nectar for several others. It is also a pollinator magnet.</p>

Perennial	White Turtlehead	<i>Chelone glabra</i>	Sun to Partial Shade	Late Summer	23-35" x 18-23"	<p><i>Chelone glabra</i> is a native wildflower that forms an upright bushy mound of green foliage with upright stems of large, white hooded flowers. Foliage is narrow with 3-6" sharply toothed paired leaves.</p> <p>Prefers moist wet site, it is lovely at the waterside. Beautiful planted with the more common pink flowered <i>Chelone</i>.</p>
Perennial	White Wood Aster	<i>Eurybia (Aster) divaricata (divaricatus)</i>	Partial Shade	Early Fall	24-28"	<p>The white wood aster is a distinctive woodland plant, native from Maine to Georgia. Slender mahogany stems twist and form loose clumps. Small white flowers, borne in fall, are so numerous that they cover the entire plant.</p> <p>Try it at the front of the border among plants with bold foliage. Prefers a moist, well-drained soil rich in organic matter.</p>

Perennial	Whorled Milkweed	<i>Asclepias verticillata</i>	Sun to Partial Shade	Summer	12-30" x 12-24"	<p><i>Asclepias verticillata</i> is an upright unbranched perennial that rambles to form colonies from underground rhizomes. Foliage is needle-like, fine textured and whorled in umbrella like clusters along the stems. Foliage offers a lovely yellow fall color.</p> <p>Fragrant white flowers occur from mid-summer and into autumn. This late bloomer is among the last milkweeds to go dormant. This makes it a very valuable late season food source for Monarch butterflies and their caterpillars.</p> <p>Plants are best adapted to sunny dry sites and are drought tolerant and vigorous. If self-seeding is an issue, remove the pods before seed are released.</p> <p>NOTE: It is poisonous to livestock and horses.</p>
-----------	------------------	-------------------------------	----------------------	--------	--------------------	--

Perennial	Wild Columbine	<i>Aquilegia canadensis</i>	Sun to Partial Shade	Spring	24"	<p>This is an erect, branching perennial, up to 2' tall, well-known for its showy flowers. A nodding, red and yellow flower with upward spurred petals alternating with spreading, colored sepals and numerous yellow stamens hanging below the petals.</p> <p>The compound leaves, divided into round-lobed threes, are attractive in their own right.</p> <p>The plant self-sows readily and will delightfully colonize this woodlands or open slopes. Prefers good drainage.</p>
Perennial	Wild Columbine	<i>Aquilegia canadensis</i> 'Corbett'	Partial Shade	Spring	18 inches tall	<p>This cultivar is a selection of our native columbine. It features clear yellow flowers that are carried delicately on thin wiry stems. It is somewhat more compact and tends to flower more heavily than the species. Like its parent, this plant is not as susceptible to leaf miner as other columbines.</p>

Perennial	Wild Columbine	<i>Aquilegia canadensis</i> 'Nana'	Sun to Partial Shade	Late Spring	6-12"	<p>'Nana' is a compact, mound-forming, herbaceous perennial with deeply divided, dark green basal leaves and, from late spring into summer, dark, erect stems bearing nodding flowers with yellow petals and erect, spurred, red sepals. The bell-like flowers of Wild Columbine attract a variety of pollinators including bees and hummingbirds.</p> <p>Columbine is popular in shade gardens, rock gardens, cottage gardens or naturalized areas. The light, airy texture of the stems and flowers combines well with a variety of early bloomers such as Wild Geranium, Foamflower, and Wild Ginger.</p> <p>Grow in fertile, moist but well-drained soil in partial shade or full sun. Blooms appear in late Spring to Summer.</p>
Perennial	Wild Ginger	<i>Asarum canadense</i>	Partial Shade	Spring	1"	<p>Kidney-shaped, leathery, dark green leaves somewhat hide the mahogany-purple-brown, pitcher shaped flowers with tail-like lobes.</p> <p>This is a woodland plant, native to North America.</p>

Perennial	Wild Pinks	<i>Silene caroliniana</i> var. <i>wherryi</i> 'Short and Sweet'	Sun to Partial Shade	Late Spring	6" x 10"	<p>Delightful, compact and easy to grow, <i>Silene caroliniana</i> is an excellent native plant for bright shade or full sun. It is covered in deep pink flowers in late spring. <i>Silene</i> 'Short and Sweet' is a fantastic plant for naturalizing, yet it can hold its own as a specimen in a container or patio garden as well.</p> <p><i>Silene caroliniana</i> prefers full sun, part shade or shade, though blooms are less numerous in shade. Soil should have average to good drainage and not be wet for extended periods. Though often found in limestone outcrops, <i>S. caroliniana</i> is not particular about pH.</p>
Vine	Wild Yam	<i>Dioscorea villosa</i>	Sun to Partial Shade	Mid Spring to Early Summer	6-10'	<p>Wild Yam is a beautiful little vine with glossy green leaves that have a wonderful pattern of veins showing. The texture effect is terrific. Small green flowers in chains yield unique three sided seed pods. Blooms first appear in mid spring and continue into early summer. The flowers are in loose straggling clusters.</p> <p><i>Dioscorea villosa</i> dies back in winter and returns from the tuber each spring.</p>

Perennial	Windflower	<i>Anemone canadensis</i>	Sun to Partial Shade	Mid Spring	12-24" x 24-30"	<p>This spring-blooming (April-June) windflower is a Missouri native plant that grows up to 2' tall and typically occurs (often in large colonies) along rivers next to levees and on river flood plains, in low, moist meadows and in moist thickets.</p> <p>Showy solitary flowers, 2" in diameter, are borne on erect stems above the foliage and feature five, white, petal-like sepals and numerous, yellow center stamens.</p> <p>A strong growing plant that needs room to move. Prefers moist soil rich in organic matter. More moisture is required for growing in full sun conditions. Slightly drier soil is tolerated with more shade.</p>
Shrub	Winter Jasmine	<i>Jasminum nudiflorum</i>	Sun to Partial Shade	Winter	3-4' x 4-7'	<p>Winter Jasmine is a great plant for problem banks and to soften walls. Bright yellow flowers are a beautiful surprise during the winter months. Its habit is mounded and spreading with slender angled stems, green when young turning gray-brown with age. Leaves are a deep glossy green in summer.</p> <p>It prefers well-drained soil but is very adaptable to soil type. Cut back hard every three years to rejuvenate. Layer to encourage colonizing.</p>

Shrub	Winterberry Holly	<i>Ilex verticillata</i> 'Chrysocarpa'	Sun to Partial Shade	Fall to Winter	8' x 6'	<p>Winterberry is a dense multi-stemmed deciduous shrub with a shapely oval form. This cultivar's bright yellow berries provide vibrant color in early winter after the leaves have fallen off. Summer flowers are inconspicuous but attract pollinators. Requires a male plant for fruit production; 'Jim Dandy' recommended.</p> <p>It prefers moist, acidic soils. Its tolerance to wet soil makes this a useful plant in poorly-drained landscapes. Works well in hedges and mass plantings.</p>
Shrub	Winterberry Holly	<i>Ilex verticillata</i> 'Jim Dandy'	Sun to Partial Shade	Fall	8'	<p>This male deciduous holly is an essential pollinator for female winterberry hollies such as 'Red Sprite' to ensure good berry production.</p> <p>An inconspicuous plant, it prefers moist, well-drained soils.</p>
Perennial	Wood Poppy	<i>Stylophorum</i> <i>diphyllum</i>	Partial Shade to Shade	Spring to Fall	12-18" x 12-18"	<p><i>Stylophorum diphyllum</i> is a gem! This clump forming perennial is lovely Spring through Fall. It has wonderfully lobed leaves with grey undersides, clear yellow cup-like flowers and grey fuzzy seed pods.</p> <p>It has a heavy bouquet of flowers in the spring but blooms intermittently through the summer, then the leaves turn lovely fall colors before it dies back for the winter. It will generously spread by seedlings but they are easy to control.</p>

Perennial	Woodland Phlox	Phlox divaricata 'Blue Moon'	Partial Shade to Shade	Spring	12" x 18"	<p>Blue Moon woodland phlox is a low maintenance, early flowering, native ground cover. Flowers appear in May atop tall stems producing a tapestry of billowy light blue display.</p> <p>Best planted in woodland setting where there is ample spring moisture in rich humusy soil.</p> <p>Great companion for bleeding heart, trillium and heuchera</p>
Perennial	Woods Spurge	Euphorbia amygdaloides var. robbiae	Sun to Partial Shade	Year Round	15"	<p>One of the finest euphorbias, this black-green euphorbia more closely resembles a forest of dwarf pittosporum. The slightly stoloniferous nature of Robb's euphorbia makes it a dynamite choice for an evergreen groundcover in a difficult and very shady site.</p> <p>In loose, well-drained organic soils, the spread will be much swifter. In very early spring, the chartreuse flowers unfurl in dramatic fashion, presenting 18" tall stalks of unique flowers that last for months... a real winner!</p>

Perennial	Yellow Foxglove	<i>Digitalis grandiflora</i> (ambigua)	Sun to Partial Shade	Summer	12-30"	<p>Yellow Foxglove has soft 1-2" yellow tubular flowers appearing in June and, if cut back after the initial show, they will flower again in September. The soft, lush foliage is only 12-18" tall but the flower spikes will grow to 3 feet. The 5-10" long, deep green leaves are lance-shaped with fine teeth.</p> <p>Foxgloves are of easy culture and make excellent cut flowers if picked when the blooms are half open. But their real strength is as dramatic and richly colored vertical accents, a look that is impossible to duplicate with another genus.</p> <p>Yellow foxglove is easy to grow in almost any type of soil except for very wet or very dry, although it prefers moist, well-drained, fertile soil. Once established it is relatively drought tolerant.</p>
-----------	-----------------	---	-------------------------	--------	--------	---

Perennial	Yellow Stargrass	<i>Hypoxis hirsuta</i>	Sun to Partial Shade	Spring	6" x 3-6"	<p>Though somewhat diminutive, yellow star grass is a tough, long-lived perennial and can be an excellent addition to the dry or moist woodland garden.</p> <p>This small plant, which grows from a hard corm, can easily be confused with a grass unless its distinctive flower is seen. Slender, thread-like flowering stems carry 2 to 6 star-shaped, bright yellow flowers below the top of the leaves. It can spread to form loose colonies, but is not aggressive.</p> <p>Tolerates a variety of soils and conditions.</p>
Shrub	Yellowroot	<i>Xanthorrhiza simplicissima</i>	Partial Shade to Shade	Spring	1-3' x 1-3'	<p>Yellowroot is a fantastic woody groundcover that easily spreads to form a dense carpet. Small purple flowers appear in spring that later produce star-shaped fruits eaten by birds. In the fall, the foliage turns from yellow to a stunning red or purple.</p> <p>Yellowroot tolerates a wide variety of soil types and takes average water. It spreads by root suckers. The roots were used by Native Americans as a dye.</p>
